RECYCLED POLYESTER MATERIALS (rPET)

Our RECYCLED POLYESTER MATERIALS (rPET) is a wide range of material for finished products including shoe upper & glove & ETC , made from post-consumer recycled water bottles , using a water-based manufacturing process that eliminates the use of toxic solvents.

The material is certified by Global Recycled Standard, a third-party organization that specializes in sustainable production practices.

One yard of RECYCLED POLYESTER MATERIALS (rPET) represents 12 half-liter post-consumer recycled water bottles.

rPET range features the same advanced features of our original materials with polyester base cloth, such as high abrasion, durability. And Our rPET material range is capable of a wide range of thicknesses, embossing, colors and touchscreen connectivity.

100% Recycled Polyester(rPET)
CANVAS
Recycled Polyester(rPET) + Polyester

RECYCLED POLYESTER MATERIALS (rPET)

RECYCLE SOLIDO SUEDE

Materials in accordance with the "Eco-friendly" as a global trend.

This one is blended with recycled polyester (rPET) made from post-consumer recycled water bottles. Superior colorfastness to washing.

UPCYCLE SUEDE

100% Polyester rPET

Composition : 100% Recycled Polyester (rPET)
+ Eco friendly water based production process.

It is upcycling product, more eco-friendly & improved materials than our original recycled polyester (rPET)

UPCYCLE SOLIDO SUEDE

"CDP rPET" Blended with "High Shrinkage Polyester Yarn" :
It has even better colorfastness to washing thanks to CDP rPET, not Polyester rPET.

Composition : CDP rPET + High Shrinkage Polyester Yarn + Eco friendly water based production process.

It is upcycling product, more eco-friendly & improved materials than our original recycled polyester (rPET)

DAEJIN S&T is

The Company that produces Synthetic Leather and Sustainable Fabric with Eco-friendly System. Established in 2005, we have many years of experiences in producing

1. VINTAGE CANVAS which is a type of waxed canvas and treated with water-based dipping process
2. All kinds of SUEDE Fabric treated with water-based dipping process
3. Recycled polyester fabric materials (rPET) treated with water-based dipping process
4. Dry PU coated synthetic leather.

We own both one facility specialized in Eco friendly water-based dipping process & Another facility specialized in Dry PU coated synthetic leather. We supply ours to our partners in domestic market(South Korea) and oversea market (Asia).

Our company was passed "VF Facility Compliance Audit" in Jun 2019. Only the companies in compliance with VF's Global Compliance Principles can pass VF Facility Compliance Audit & ensure that safety, labor welfare and observing environmental laws.

VISION & PURPOSE

We currently have many customers around the globe, and We always do our best to maintain a close partnership with our suppliers in order to provide our customers with the products with reliable high-quality products.

We are determined to secure a well-defined competitive edge in the market with reliable high-quality products. Over the years, the confidence and collaboration of our employees has permitted us to improve our capacity and competitiveness. I am confident that, with this optimal productivity and profitability, DAEJIN S&T will continue to prosper and become a country's leading manufacturer in the near future.

Eco-friendly Factory established with existing dry PU coating production line, we have kept up with the current trend with Water based Eco-friendly Factory where we additionally established in Saengrim, Kimhae.

We are actively responding to the future with future-oriented vision.

We promise you that we will do everything in our power to satisfy our customers

We will plan ahead and strategically invest in equipment and care about people and their businesses with humanism.

We will expand all options and provide new value for our customers.
