## ECO SUEDE

Its base cloth for polyester, CDP. It's processed with eco-friendly Water-based dipping process

### Water-based dipping process.

The process for dipping fabrics with PU resin & water. So, it can be called as eco-friendly product.

No organic solvent substance is detected.

Also, it can simplify manufacturing processes for energy conservation & minimize discharging waste water.

Daejin S&T's **ECO SUEDE**  
To be with you at your important moment.

*ECO SOLIDO SUEDE*

*ECO STRONG SUEDE*

## RECYCLE SOLIDO SUEDE

Materials in accordance with the "Eco-friendly" as a global trend. This one is blended with recycled polyester (rPET) made from post-consumer recycled water bottles. Superior colorfastness to washing.

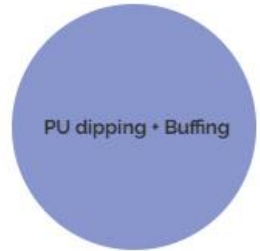

Today, there are many recycling efforts initiated by textile brands & the number of customers who want to take part in this movement throughout the world continues to climb.

### Valuable choice for human being and natural environment :

1. plastics wastes flowing into the ocean amount to roughly 8 million per 1 year. and it causes enormous disturbances to the marine ecosystem.
2. Microplastics have polychlorinated biphenyls(PCB), polycyclic aromatic hydrocarbon(PAH),heavy metals.

So it is harmful to the human body.

Now, A small number of people's choices for Sustainable Fashion is turning into a number of choices.

## UPCYCLE SUEDE

100% Polyester rPET

Composition : 100% Recycled Polyester (rPET) + Eco friendly water based production process. It is upcycling product, more eco-friendly & improved materials than our original recycled polyester (rPET)

Today, there are many recycling efforts initiated by textile brands & the number of customers who want to take part in this movement throughout the world continues to climb.

### Valuable choice for human being and natural environment :

1. plastics wastes flowing into the ocean amount to roughly 8 million per 1 year. and it causes enormous disturbances to the marine ecosystem.

So it is harmful to the human body.

Now, A small number of people's choices for Sustainable Fashion is turning into a number of choices.

## UPCYCLE SOLIDO SUEDE

"CDP rPET" Blended with "High Shrinkage Polyester Yarn" :  
It has even better colorfastness to washing thanks to CDP rPET, not Polyester rPET.

Composition : CDP rPET + High Shrinkage Polyester Yarn +  
Eco friendly water based production process.  
It is upcycling product, more eco-friendly & improved materials than our original recycled polyester (rPET)

## DAEJIN S&T is

The Company that produces Synthetic Leather and Sustainable Fabric with Eco-friendly System. Established in 2005, we have many years of experiences in producing

1. VINTAGE CANVAS which is a type of waxed canvas and treated with water-based dipping process
2. All kinds of SUEDE Fabric treated with water-based dipping process
3. Recycled polyester fabric materials (rPET) treated with water-based dipping process
4. Dry PU coated synthetic leather.

We own both one facility specialized in Eco friendly water-based dipping process & Another facility specialized in Dry PU coated synthetic leather. We supply ours to our partners in domestic market(South Korea) and oversea market (Asia).

Our company was passed "VF Facility Compliance Audit" in Jun 2019. Only the companies in compliance with VF's Global Compliance Principles can pass VF Facility Compliance Audit & ensure that safety, labor welfare and observing environmental laws.

## VISION & PURPOSE

We currently have many customers around the globe, and We always do our best to maintain a close partnership with our suppliers in order to provide our customers with the products with reliable high-quality products.

We are determined to secure a well-defined competitive edge in the market with reliable high-quality products. Over the years, the confidence and collaboration of our employees has permitted us to improve our capacity and competitiveness. I am confident that, with this optimal productivity and profitability, DAEJIN S&T will continue to prosper and become a country's leading manufacturer in the near future.

Eco-friendly Factory established with existing dry PU coating production line, we have kept up with the current trend with Water based Eco-friendly Factory where we additionally established in Saengrim, Kimhae.

We are actively responding to the future with future-oriented vision.

We promise you that we will do everything in our power to satisfy our customers

We will plan ahead and strategically invest in equipment and care about people and their businesses with humanism.

We will expand all options and provide new value for our customers.
