VINTAGE CANVAS

- ❖ CANVAS fabric with the World's First Manufacturing Process Patent
- ❖ Polyester-based Universal CANVAS fabric
- ❖ 100% Recycled Poly
- ❖ Memory Canvas Base with Vintage Effect
- ❖ PE Resin Water-based Impregnation Process
- ❖ C0 (Fluorine-free) Water Repellent

We invented the world's first "Vintage canvas" as showing crinkles, scratch with patented manufacturing process.

Golden goose which is one kind of famous shoes shows crinkles, scratch like vintage style and it shows current trend for fashion in Europe. it costs several hundred thousand dollar.

3 particular points are

A base for polyester : universal fabrics for "canvas"

A base for 100%recycled poly (RPET)

A base showing crinkles, scratch for 100%recycled poly (RPET).

VINTAGE CANVAS (WAXED CANVAS)

The water-repellent qualities and unique character of waxed canvas have been known and used in one form or another for hundreds of years. Extremely popular in the early to mid-1900s, it has in recent years seen a major resurgence.

Vintage Canvas is

strong and very durable, and is ideal for backpacks, work aprons, jackets, vests, dog gear, saddle bags, tote bags, book bags, storage bags, all kinds of outdoor gear and packs, for furniture, hat, cap, etc

The main points about VINTAGE CANVAS

1. It is PE wax coated. It is more heat resistant than paraffin wax coated ones.
2. No volatile organic solvent substance is detected.
3. PE resin type has characteristics of water resistance & tasteless, harmlessness, odorless.
4. C0 (fluorine-free) water repellent

These bases being done with our water-based PE dipping process is VINTAGE CANVAS.

The list of base cloth

1. A base cloth for polyester : universal fabrics for "canvas"
2. A base cloth for 100%recycled poly (rPET)
3. A base cloth for cotton
4. A base cloth for Polyester + Recycled poly (rPET)

DAEJIN S&T is

The Company that produces Synthetic Leather and Sustainable Fabric with Eco-friendly System.
Established in 2005, we have many years of experiences in producing

1. VINTAGE CANVAS which is a type of waxed canvas and treated with water-based dipping process
2. All kinds of SUEDE Fabric treated with water-based dipping process
3. Recycled polyester fabric materials (rPET) treated with water-based dipping process
4. Dry PU coated synthetic leather.

We own both one facility specialized in Eco friendly water-based dipping process &
Another facility specialized in Dry PU coated synthetic leather.

We supply ours to our partners in domestic market(South Korea) and oversea market (Asia).

Our company was passed "VF Facility Compliance Audit" in Jun 2019. Only the companies in compliance with VF's Global Compliance Principles can pass VF Facility Compliance Audit & ensure that safety, labor welfare and observing environmental laws.

VISION & PURPOSE

We currently have many customers around the globe, and We always do our best to maintain a close partnership with our suppliers in order to provide our customers with the products with reliable high-quality products.

We are determined to secure a well-defined competitive edge in the market with reliable high-quality products. Over the years, the confidence and collaboration of our employees has permitted us to improve our capacity and competitiveness. I am confident that, with this optimal productivity and profitability, DAEJIN S&T will continue to prosper and become a country's leading manufacturer in the near future.

Eco-friendly Factory established with existing dry PU coating production line, we have kept up with the current trend with Water based Eco-friendly Factory where we additionally established in Saengrim, Kimhae.

We are actively responding to the future with future-oriented vision.

We promise you that we will do everything in our power to satisfy our customers

We will plan ahead and strategically invest in equipment and care about people and their businesses with humanism.

We will expand all options and provide new value for our customers.
